Share of very active investors is increasing

2.1 (+24 %)
Average number of investments per angel investor in year 2021.
The most active investors invest majority of the capital.

More experienced investors transfer their knowledge within the network. FiBAN trains 130 persons yearly.
About

FiBAN annually conducts an investment survey of its members. The survey has been sent out to all FiBAN members since 2010, the year FiBAN was founded. This constitutes Europe’s most comprehensive yearly survey of business angels. Through quality research and analysis we aim to offer valuable and unique knowledge for the whole startup ecosystem.

Since FiBAN’s data is based on voluntary questionnaires annually collected from our members, it is more indicative than exact. The response rate has increased throughout the decade reaching an all-time high, 76% with 480 answers, in 2021. Our figures consist only of the data provided to us: we do not cover all angel investing activity in Finland. However, by pooling data, FiBAN can look into trends and findings which benefit the whole angel investor and startup ecosystem.
About

Please note:
● The sums of the statistics may deviate from 100 % due to rounding.
● As figures are updated, newer statistics replace older ones.
● FiBAN handles all data confidentially and anonymously.
